

Spacer Pro™

For Bracket Pro Serie™ mounts

Features

- Lightweight
- Anodized coating
- Compact size
- Does not block the 360° rotation of swivel base
- Same holds
- Safe & Easy
- Immediate access
- Matches perfectly with our mounting systems

Application of usage

- Crash Cart
- Emergency Work Space
- Stretcher
- Biomed Dept.

Advantages

- Minimum space required for installation
- No additional holes needed
- Latex free
- Biological fluid and sodium resistant
- Rust resistant
- 1-year full warranty

Any medical equipment that has been inadequately installed in ambulances, other emergency medical service (EMS) vehicles or crash carts, can potentially pose a serious risk or become dangerous in the event that the vehicle makes frequent or sudden stops, turns or rushed departures. This situation can result in damaged expensive medical equipment or even inflict injuries on a patient, ambulance personnel or clinic staff.

Our option mount systems **Spacer Pro** are designed for a fast solution to raise or extend the surface base installation, with no interferences to the surface base. The features of this extension support are its very small size (weight), perfect fit to the standard base, with aligned holds for less time for installation. They can be installed in the same position or area to secure the mount and are offered at six (6) different heights or can be customized. The mounting extensions offer different heights for universal or standard surface base.

They have many characteristics; more specifically allow rotating up to 360 degrees with the base, fitting the shape and the holes for quick installation, without any compromise of use the surface base. The surface system extension will keep the features of the base and resist to an impact of many times the G- Force, in an accidental drop situation. To spare the expenses of costly repair or replacement of the equipment, and medical care and possible legal redress for injury, consider outfitting your crash cart, emergency workspace or biomed workshop with a deployment system for monitor and/or defibrillator.

About Us

Technimount System creates mounts and brackets for portable medical devices such as defibrillators, ventilators, and pumps, that adapt to different brands of medical equipment for OEM ambulance manufacturers, EMS users, and hospitals.

For use with [Technimount System Bracket Pro Series™](#) mounting systems

TECHNICAL SPECIFICATIONS

Product name:	Spacer Pro™	
Compatibility model:	Bracket Pro Serie - Standard or Universal model only	
Environment of usage:	EMS - Hospital - Clinic - Biomed Dept. - Military hospital	
Material:	Base: Aluminum high density with anodization process	
Temperature of usage:	- 35° C @ 45° C (Direct conduction)	
Impact Resistance¹:	Drop test 1.5 M and Same as Bracket Pro model	
No. of installation points:	4 points under surface base aligned with the surface base	
Dimensions (both parts assy - overall):	7-1/2" With. X 8" Depth. X 3/4" Height depending. (in)	
Rotation:	Allows 360° degrees with standard base	
Features:	Compatible with Standard and Extended Surface Base	
Weight:	Total: 1.54 lb - 2.58 lb (depending on height)	
Options:	Spacer (height extension mount 3/8", 1/2", 3/4", 1", 1-1/4")	
Part number²:	825-00-SPC038	Spacer Pro - 3/8" height
Part number	825-00-SPC012	Spacer Pro - 1/2" height
Part number	825-00-SPC034	Spacer Pro - 3/4" height
Part number:	825-00-SPC100	Spacer Pro - 1" height
Part number	825-00-SPC114	Spacer Pro - 1-1/4" height
Part number:	825-00-SPC114-AN	Spacer Pro - 1-1/4" Inclined height

Counter Lip Height (in)	Surface Base Height (in)	Spacer Height Required (in)	Part No.
