The Cardiatek system is the only universal solution to mount the AIC in different applications such as, on surface, floor, cot/stretcher and wall systems. It is also designed to fit any ground and air ambulance configuration in North American and European markets.

At Technimount, we understand that clients need solutions that they can count on. We design and develop the best solutions for quality, flexibility and safety in all of our mounting systems through collaborative partnerships with our customers.
CARDIATEK™ COMPLETE SYSTEM
A System to secure the AIC medical device during transport to avoid possible injuries to patient and crew as well as reduce risks of potential damages to, or replacement of, medical equipment.

POTENTIAL CONFIGURATIONS

Mounting Bracket
Wall Mount System
(Ground Ambulance in Europe)

Air Ambulance Floor Mount
Technimount Universal Standard Base
Technimount Stretcher Safety Arm System
The Cardiatek mounting bracket is designed for the Automated Impella Controller (AIC) device. This Technimount solution is a flexible system that can be used in different applications, such as on surface, floor, cot/stretcher, and wall systems. With the use of the floor mount, this bracket is compatible with the floor platform of air ambulances in Europe. The wall mount and bracket can be used for ground ambulances in Europe and North America.

The standard bottom disc is used with Technimount’s universal standard bases that can be mounted in different locations according to configuration and desired position.

The top-down movable handle is designed for easy access to the unit.

Retractable Hooks for Temporary Transfer

Acetal Feet to Protect the Disc and Bracket when Placed on the Floor or Ground

The small anti-rotation disc on the back is used for vertical support on different wall or arm systems.

Quick Release Fluid Pole or Canister Holder
The Cardiatek Wall Mount is designed for the Automated Impella Controller (AIC) mounting bracket. It is comprised of a high-density aluminum frame that includes a micro base to accommodate the small anti-rotation disc on the back of the mounting bracket. Four quick release clamps are used to secure the wall mount on ground ambulance wall rails in Europe.

The Cardiatek Wall Mount is compatible with all of Technimount’s products.

**OVERVIEW OF FEATURES**

- Reinforced Wall Platform with Lightweight Design
- Quick Release Mechanism for Bracket
- Vertical Micro Base with Long Release Button for Easy Access
- Quick Release Clamps QR-Gripp™
The floor mount is designed for floor rails of air ambulances in Europe. The system is comprised of a high-density aluminum plate with T-shape handles with stainless steel plungers for easy installation into the floor rails. The floor mount with a Technimount standard base can accommodate the Cardiatek mounting bracket, as well as a multitude of different medical devices that have a Technimount bracket and bottom disc.

The Cardiatek floor mount is compatible with all of Technimount's products.
CARDIATEK™ COMPLETE SYSTEM

FEATURES

- Compatible with Stryker stretchers and with Technimount’s products
- Compatible with Technimount’s universal standard base for NA ambulance builders
- Compatible with air ambulance floor and ground ambulance rail mount systems in Europe
- Includes hooks for power cable, canister holder and quick release removable fluid pole
- Top-down movable handle for easy access to the unit
- SAE J3043 certification in progress (Ground USA-Canada) and DIN EN 1789 (Europe)

BENEFITS

- Flexibility for use in different applications (surface, floor, cot/stretcher, and wall systems) as well as other EMS or hospital environments
- Access to screen from all angles (360° rotation)
- Easy insertion of the AIC into bracket (top insert)
- Built-in quick release mechanisms to easily remove device almost instantly
- Reduce risk of damage causing costly repairs or complete replacement of medical equipment
- Quick installation by end user with no modification needed to medical equipment

YOUR SAFETY IS OUR PRIORITY

When it comes to air and ground ambulance transport, patient and crew safety is the main concern. Providing safe transport not only applies to the vehicle or aircraft itself but also to the ability to effectively secure medical equipment.

Having robust and certified mounting systems can help avoid costly repairs, complete replacement of equipment and possible injuries to patients and crew.

ABOUT TECHNIMOUNT

Technimount designs and develops mounting solutions for different medical equipment such as defibrillators, ventilators, and pumps or other devices, in hospital, EMS, or military environments.

Technimount System is the only manufacturer to have a universal mounting system that can fit on multiple brands, models, and applications of portable medical equipment for ambulances, stretchers, and hospital environments.

SAFETY AND FLEXIBILITY WHERE IT MATTERS MOST
