THS PREMIUM IV STAND

Modular IV Stand for a Wide Range of Applications

From the light-duty model to the intensive use model that can support numerous IV bags, pumps or other medical devices the THS Premium IV Stand offers single, dual and triple-pole options as well as modular accessory configurations to meet the specific needs of any care unit.

As part of the THS family, the Premium IV Stand features two of our innovative technologies: The Techni-Track* provides maximum modularity and flexibility for accessory installation and interchangeability, as well as Technimount's Controlled Descending* technology integrated in its IV pole for an easier height adjustment and IV bag installation and removal.

This low-noise, smooth gliding IV pole is also highly stable due to its unique six-wheel base design.

THS WALL MOUNT SYSTEM

Ergonomics in Any Hospital Room

The Wall Mount System is designed to be installed either in an exam, operating, hallway or patient room with minimal space requirements. These workstations incorporate essential ergonomic features, such as height adjustment and a retractable arm to minimize its footprint when it is not in use.

As part of the THS family, the Wall Mount System features our innovative technology, the Techni-Track for maximum modularity and flexibility. Its robust design structure allows for the installation of different models of monitors and all in-one computer monitors.

THS DOCKING STATION

Intra-Hospital Transfers Made Easy

Moving a patient in their bed from one care unit to another is now easier using the THS Docking Cart. Safely attached to virtually any type of hospital bed, the mounting system THS Docking Cart secures a multitude of medical devices and heavy equipment during intra-hospital transfers. Only one caregiver is required to move the patient and their equipment, maximizing the efficiency of staff.

As part of the THS family, the Docking Station features two of our innovative technologies: Techni-Track for maximum modularity and flexibility for accessory installation and interchangeability, as well as Technimount's Controlled Descending technology integrated in its IV pole for an easier height adjustment and smooth pole descending.

THS TECHNI-CLAMP

Revolutionizing Medical Device Installation on Pole

THS Techni-Clamp is a true game changer in the medical practice. This patented technology allows for quick installation of pumps and other medical devices on IV pole and tubular structures in the most ergonomic way.

Its unique design allows for intuitive installation and removal of medical devices. Its original fastening mechanism secures the medical device in only a few turns. Highly versatile, the Techni-Clamp can accommodate the most used medical devices in the market.

Welcome to the new era of ergonomics and efficiency in installing medical devices on IV pole.

HERITAGE UNIVERSAL MOUNTING BASE

The Synergy Between Pre-Hospital and Hospital Services

Inspired by Technimount EMS Standard Surface Base which is at the center of the original concept that revolutionized medical device transport in the Emergency Medical Services (EMS) market, Technimount Medical's Universal Mounting Base becomes the missing link in the creation of efficiencies between pre-hospital and hospital services.

The Universal Mounting Base is compatible with all Bracket Pro Serie® products with a Standard Bottom Disc which are widely used in the EMS. Its versatility allows for easy installation on roll carts, crash carts, auxiliary arms and wall mounts. Its locking mechanism secures perfectly the medical device ensuring safety to Healthcare providers when in motion. Its unique design provides a 360° rotation and its quick release mechanism allows for easy access to medical device controls and increased flexibility.

At Technimount Medical Inc. we understand that healthcare professionals need equipment that make their everyday practice easier. We design and develop quality solutions which are flexible and easy to use, allowing them to focus on what matters most - patient care.

Technimount Medical follows the same path as Technimount System, to continuously innovate to make healthcare practices more efficient and safer. Since 2013, Technimount System has been recognized as the leader in the Emergency Medical Services' industry, setting the standard in safe and flexible mounting systems for medical devices.

With the same mindset, Technimount Medical, an ISO 13485 certified company, creates distinctive products that respond to the ever-evolving healthcare practices. Our Technimount Healthcare System™ (THS™) and Healthcare Essentials product lines enable caregivers to move efficiently and safely all the medical devices needed to successfully treat their patients, wherever they are inside the hospital or remotely via telemedicine systems.
