## **BRACKET PRO SERIE® 350**

MOUNTING SYSTEM FOR THE LIFEPAK® 35 MONITOR/  
DEFIBRILLATOR

---

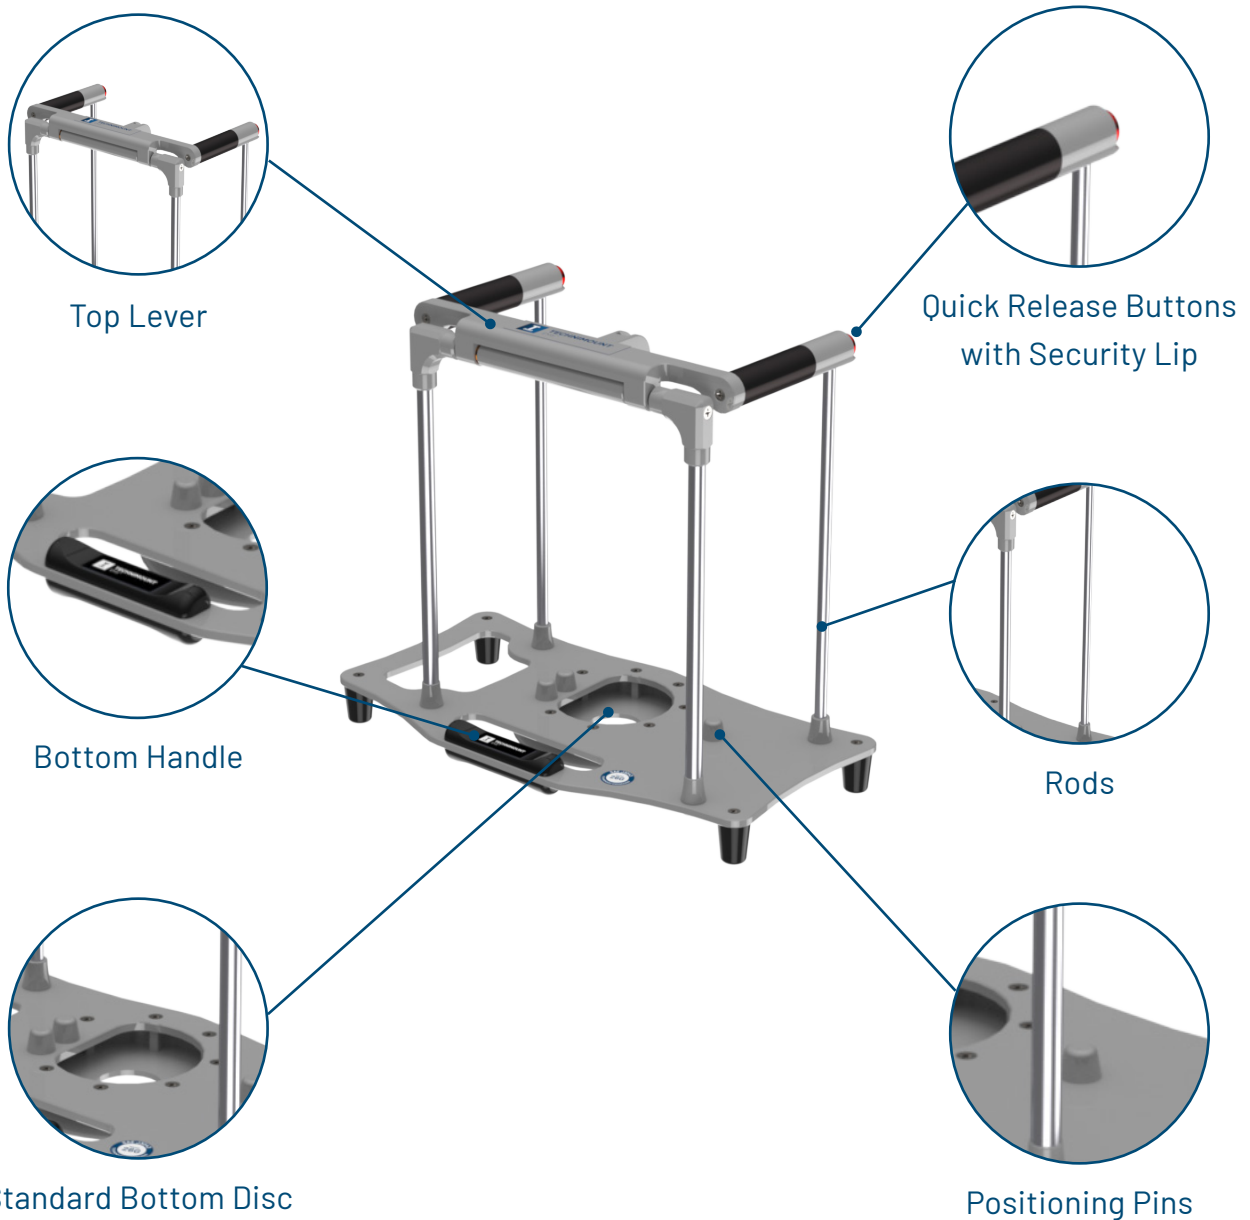

**SAFETY AND FLEXIBILITY**  
**WHERE IT MATTERS MOST**

# BRACKET PRO SERIE® 350

## Product Components

The Bracket Pro Serie® 350 is designed to secure the LifePak® 35 monitor/defibrillator on countertops during EMS and Critical Care ground transport. It features a top lever that enables quick and easy insertion and removal of the medical device from the bracket.

Considering the footprint of the medical device, this mounting solution was designed to be heavy duty and robust for demanding EMS conditions while still respecting the device's integrity. Moreover, the Bracket Pro Serie 350 is tested in compliance with the highest safety standards for securing medical devices during transport, SAE J3043.

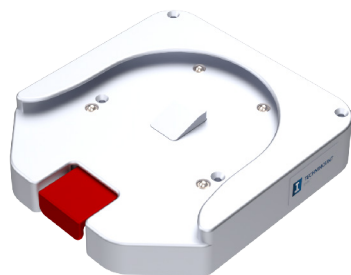

# BRACKET PRO SERIE® 350

## Highlights

### FEATURES & BENEFITS

- Standard bottom disc for installation on Technimount's Standard Surface Base, allowing 360° rotation on different counter configurations.
- Tested in compliance with SAE J3043, the highest industry safety standards for transport of medical devices.
- Full access to the medical device and its connectors from all angles.
- Lever equipped with quick release buttons to easily install or remove device from bracket.
- Stainless steel rods to secure medical device with or without its original Stryker bags.
- Handle that provides the second grip needed to easily rotate or slide the device and its bracket from the Standard Surface Base.
- Protective lip covering the quick release buttons to prevent accidental activation. Additionally, both buttons must be dually pushed to release the lever.
- Positioning buttons for added retention, keeping the device securely positioned within the bracket.
- Integrated feet to provide stability and prevent damage to the medical device when bracket is set on a surface.

## CONFIGURATIONS POSSIBLES

Standard Surface Base
