

UNIVERSAL MOUNTING BASE POSSIBLE CONFIGURATIONS

The Universal Mounting Base is a lightweight and highly versatile solution designed to easily install and remove a medical device on various surfaces in clinical and hospital environments.

Compatible with all Bracket Pro Serie® products with a Standard Bottom Disc, the base improves synergy between pre-hospital and hospital services.

Its sliding lock mechanism secures the medical device perfectly, ensuring safety for healthcare providers when in motion inside the hospital.

Countertops

Enables mounting of medical devices on any flat surface.

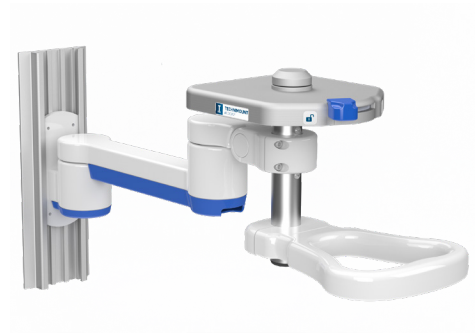

THS® Medical Device Stand

Ensures medical devices remain with the patient during intrahospital transport.

THS® Medical Pivot Arm

Supports medical devices and various accessories on walls or carts.

Flex Adapter

Allows the Universal Mounting Base to interface with third-party articulated arm systems.

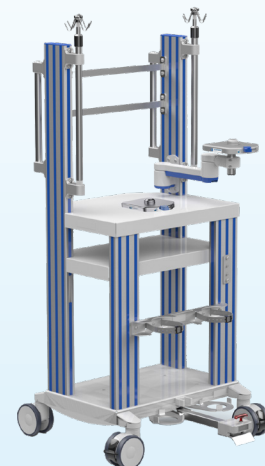

Flex Adapter Shelf

Enables elevated installation of the base on crash carts and countertops to free-up valuable surface space.

THS® Neonatal Cart

Transport cart for Dräger Babyleo® TN500 or Babyroo® TN300, with multiple medical devices.
